Dean Dennis Kratz spearheaded the team effort to review not only UT Dallas' compliance with the SACSCOC Principles but also the UT System's and Coordinating Board's compliance. Both the System and the Board played an integral role in UT Dallas' operation, and to the extent that they provided the framework for UT Dallas' performance, their performance was also a factor. Additionally, this team reviewed UT Dallas' mission statement, how that mission statement translated into action, and the role of the faculty and the administrative staff in leading the institution. Academic governance (the role the faculty played in determining the direction of the University) was a critical element in UT Dallas' reaffirmation. That UT Dallas had an active Academic Senate and an active Staff Council suggested that the policies and procedures did have a rigorous review process, and such a review process was an important element in a successful university. That the Student Government had also taken an active role in recent discussions about tuition policy and seats official representatives on virtually every major university committee also suggested that the role of students in the University's governance was not only important but also vital.

Committee for Mission, Governance, and Administration Members
